**The volcano was named after Russian traveller Vasiliy**

Golovnin, who was digesting the Kuril Islands at the beginning of the XIX century and made 2 trips around the world. At the bottom of the caldera there are 4 small domes and 2 craters — Lakes Boiling and Hot. At the bottom and along the shores of the first lake hot keys beat, mud pots and hot steam emanate. It is forbidden to swim in it. Swimming in Lake Hot, on the contrary, is a great pleasure. If you wish, you can climb one of the hills and make beautiful panoramic photos.

**In the evening, you will return to the hotel and dine in a**

cafe.

#### **Day 8**

**Today you will have a hiking route to Cape Stolbchaty**

located on the coast of the Sea of Okhotsk. It is included on UNESCO's World Heritage List. You will walk along Stolbovo Ecological Path, see hot mud springs and come to the coast (8 km, the walking part can be shortened upon request). Here, you will inspect rocks of volcanic origin, formed from five-/six-sided stone pillars.

**The path to Cape Stolbchaty passes through various plant**

communities, crossing high-altitude vegetation zones. Please, pay attention, that this hiking route is rather difficult. You will have to overcome very narrow rocky areas of the coast. In some places the path will pass through the cliffs at an altitude of 3-4 meters above the sea.

**For lunch you will have sandwiches, vegetables and fruit,**

tea. By the evening you will return to the hotel, where you will have dinner and rest.

#### **Day 9**
